

iSCADA® FlowAlert™ is a world-class turnkey remote monitoring and alarming service based on M2M's proven StatusAlert product. FlowAlert is targeted at small-sized compressors and includes 24x7 Network Operating Center support, which provides remote system monitoring and customer support.

How it works

Once every 15 seconds the M2M FlowAlert scans for status change of a pressure switch and if low flow is present the switch trips and the unit transmits a shutdown notification via the built-in satellite transceiver.

After a shutdown has occurred the unit automatically resets when adequate pressure is resumed and transmits a running status notification.

Once every 24 hours the FlowAlert transmits a "heart beat" message that includes a time stamp and status (running or not running).

Shutdown notifications are displayed on a secure web page and may be received via text messaging, e-mail, or answering service.

Benefits

- ▶ Inexpensive reliable callout service
- ▶ Travel time saved
- ▶ Quicker response time
- ▶ Improved resource management through better informed daily operational planning
- ▶ Improved reporting (automated downtime & other equipment related reports)
- ▶ Potential increase in revenues (charging clients for 1st call, callout services, & downtime reporting)
- ▶ Reduced safety risks (reduces vehicle drive time, and therefore accidents and personal injury)
- ▶ Reduced vehicle cost (gasoline, vehicle repairs, and other maintenance costs)
- ▶ Improved operational productivity
- ▶ Improved customer relations

Cost Savings

- ▶ System pays for itself if just one site visit per Quarter is eliminated
- ▶ Increases operational productivity by planning daily activities around problem units
- ▶ Reduces safety risks by reducing driving time
- ▶ Automated downtime reporting provides proof of operational availability
- ▶ FlowAlert service is portable allowing transfer from one well to another

Monitor • Know how your remote assets are operating

Manage • Use the knowledge to manage your assets

Optimize • Lower costs & increase profits

Features

- ▶ Rental option available (no capital expense)
- ▶ Risk-free 30 day trial
- ▶ Proven, robust and reliable service
- ▶ 99.7% availability guaranteed by Service Level Agreement
- ▶ Automated reporting includes:
 - Run-time report
 - Individual well down-time reports
- ▶ Optionally reports first-out shutdown code if available from panel
- ▶ Battery power option (2 years operation)
- ▶ Simple 1 hour installation
- ▶ 24 x 7 M2M Network Operating Center support
- ▶ Integrates with M2M's standard iSCADA® service
- ▶ Ideal for "FIRST CALL" applications

Options

- ▶ Solar power

Other AlertServices™ Products

- ▶ StatusAlert™
- ▶ DataAlert™
- ▶ CompressorAlert™
- ▶ LevelAlert™
